

**The Ultimate
Eye Examination**

PINDERS

The Ultimate Eye Examination

A woman is shown from the chest up, wearing a white head-mounted device. Her eyes are illuminated with a bright red light, and she is looking towards the camera with a slight smile. To her left, a piece of medical equipment, likely a retinal scanner, is visible, featuring a circular dial with numbers like 6.4, 7.6, 10, and 12. The background is dark with a blueish tint.

The Gold Standard in Eyecare

At Pinders you can expect the highest standards.

Our Optometrists use the latest equipment available, giving you the best type of eye examination on the market.

We allocate plenty of time for our Optometrists to complete an industry-leading eye examination. It gives us time to fully understand your visual needs, complete a detailed health examination of your eyes and accurately calculate your prescription.

We always offer clear and honest advice with personalised recommendations to enhance your vision, which are thoroughly briefed to our dedicated Dispensing Opticians.

With over 75 years experience, we know what we are doing when it comes to eyecare.

- **The best type of eye examination available on the market**
- **Adequate time allowed for a thorough eye examination**
- **Clear and honest advice**

PINDERS

State-of-the-Art Technology

Pinders have the most advanced technology available

Our qualified Optometrists will use the latest eyecare technology to help assess your vision and understand your eye health, including *Optical Coherence Tomography (OCT)*, *Optomap* and *Myah*.

These instruments set new standards of performance, giving our Optometrists the most detailed information possible.

Our instruments are also able to detect a number of eye conditions even earlier than before, including glaucoma and macular degeneration disease.

Pinders give you uncompromised clinical excellence.

- Three dimensional imaging
- Microscopic-level retinal scanning
- Corneal topography and rendering
- Meibomian gland analysis
